

Order Fulfillment

Order Fulfillment and Delivery Timeliness

This page highlights how reliably customer demand is being fulfilled and where service issues are most likely to affect the customer experience.

Use it to monitor service levels, recurring delay patterns, and the orders that need operational follow-up.

> fulfillment_kpis

> 1 record with 4 properties

On-Time Delivered Rate (%)

75%

Not Delivered Yet (%)

33%

Average Delay (Days)

11.6

Fully Delivered Rate (%)

67%

The service view now separates completed delivery performance from open backlog. Early deliveries still count as on time.

Inventory Position

Inventory Position by Plant, Storage Location, and Material

This page shows where inventory is currently sitting and where stock imbalances may create either working-capital pressure or service risk.

Use it to see which plants hold the most stock, which material groups dominate the portfolio, and where empty positions may need attention.

> inventory_kpis

> 1 record with 3 properties

Unrestricted Stock	Stock Positions	Zero-Stock Positions
5,799,633,575.00	30,016.0	0

The inventory view reflects the current stock position, which makes it best suited for availability and concentration decisions.

Procurement Performance

Procurement Performance and Supplier Reliability

This page shows where purchasing exposure is building up, which suppliers are underperforming, and where overdue receipts may disrupt operations.

Use it to prioritize supplier follow-up, review open commitments, and focus on the backlog areas with the highest operational or financial impact.

> procurement_kpis

> 1 record with 3 properties

Open Commitments	Overdue Share (%)	Fully Received Share (%)
4,617	26%	74%

Quantities should be compared within the same unit of measure, and values should be interpreted within the same document currency.
